SHAPERS COMMENTS:

This 9' 6" classic long board style blank was created by long time shaper Hank Byzak and dedicated EPS proponent Dan Hirsch. Their approach was to create a tight tolerance shaping blank and/or a functional big guy board that would be close to finished right out of the pressure molding process with very little fine tuning left to complete the shape.

NOTES:

- Available densities: 2.2 PCF; 2.5 PCF; 2.9 PCF
